About This Game

Railroad X is more than just a Railroad Simulation. With Railroad X you can build your own railroad world in a dimension, which is almost impossible to realise in real model railroad: wide layouts with driveways and vehicles of all kinds – with cars and buses from all railroad eras. Whether you are a fan of steam trains or high speed railways, the limitations that exist when creating a model railway do not apply to the world of virtual railways.

With Railroad X you can build complex railway worlds on your PC or notebook and it is possible to control trains as a train driver. Of course you can control the entire rail traffic with a sophisticated signal system. Build train consists from steam, diesel and electric locomotives, passenger and freight cars. Railroad X offers a beautifully designed user-friendly interface, that puts many functions intuitively in scene. The new 2D plan transforms the layout top view in an artful yet clear drawing like the experienced model railroaders know it from trade magazines.

With virtual Railroad X, your trains will pass through landscapes whose appearance changes according to the time of day and local weather conditions, thus providing an extraordinarily life-like atmosphere. Additionally, there are animated figures and animals enlivening the scene. Besides cows and horses, fishes and birds, you have animated travellers and passersby.

Railroad X has a long history. The prototype of this software, EEP – Eisenbahn.exe, was created by Software Underground in 1998 and then continuously developed and enhanced each year. Since version EEP 4, the Publisher TREND and Soft Pro have been responsible for the development. In 2012, the founders of the program were responsible for the most extensive revision of the software since version EEP 3. After a year of hard work, they succeeded in creating a new version with Railroad X, which includes important features like a new grapical user interface, animated figures and interactive cabs.

Features of Railroad X

- Detailed rolling stock

- Different track systems

- Road, sea and air transport

- Sophisticated signal control

- Timetable editing

- Multi-train control

- Internal program moviemaking

- Animated figures and animals

- Controllable train cab views

- Accurate Landscaping

- 3D view

Title: Railroad X
Genre: Simulation
Developer:
TREND, Soft Pro
Publisher:
Koch Media
Release Date: 9 Jun, 2014

 b4d347fde0

Minimum:

OS: Windows Vista/ 7 /8

Processor: Dual-Core 2,5 GHz

Memory: 2 GB RAM

Graphics: 1GB graphics card, Pixelshader 3.0

DirectX: Version 10

Network: Broadband Internet connection

Storage: 4 GB available space

**Sound Card:** 2.0-Soundcard

Very good FPS from the early 2000s. I remember playing the PS2 version as a kid.

Years later, I finally picked this on sale not that far ago to play it again. The game is pretty fun and intense. The close quarter combat in a urban enviroment is quite relentless and intense. There is around 16 missions total and is worth a good playthrough.

My only complaint is the enemy and friendly AI is showing it's age. But that's a minor complaint, really.

Overall; 8/10 if you want some operating in the streets Somalia with a CAR-15.. when I passed level 12 I played it then when I go to go back on to Zuma another day it takes me to level 10-1. Mibibli\/10. Soldier Summit is the hyped up "sequel" to follow the lines of donner pass and canadian mountain passes. Although i like the UKTS version i have to give DTG some credit on this one.

 PROS
Very nice scenery
Locos all seem good
isnt boring, something interesting around each corner.
DRGW is always a win for me
Long

 CONS
Laggy around the yards.
Lag spikes
SD40T-2s horn can be heard way further away than it should do, also the bell is too quiet
F40s passenger view is very poorly made

All in all i love this route and im gonna have a lot of fun in the future

8.5\/10. Brought this when I got the game. Rather worth it and some extra mons to the developers.. This was weird, and cheap.. I'm a huge sucker for these types of games and so far am loving this one. If you loved Capitalism then the odds are good you'll like this one too. I really hope the devs intend to keep working on it adding new supply chains and industries. If I had one complaint so far it's that as you start to build out more and more supply chains it can become pretty tough to keep track of how many resources you need in different places. Would be awesome if there was some advanced research available to unlock some tools to help keep track of things. But I consider that a minor annoyance in anotherwise very fun game.. A gorgeous top down two stick shooter from my favorite gaming company! Simply said, the best of its kind! It's incredibly fun to drive around the beautiful destructable maps shooting bad guys. The price is great too so if you like 2d action games, this is the best you can get.. how to use this?

Game is currently unplayable due to graphics bug on laptop - no minerals/items/etc are visible on screen. Advised known issue and they are working on a patch.. Cool software. I wish they let me add more layers, but it's a pretty interesting tool that let you make very innovative arts. Very usefull when you're talking about concept for games and animations.. Just tried this on CV1. It's not a game as such, but as an exploration/sitting around admiring the view experience, it's fantastic. The visuals look great and the minigames are entertaining (particularly flying as the bird). If you're looking for somewhere to just hang out in VR, this is perfect.. It is just a demo \/ game template, no full game. Two minutes playtime, then you have to start again. Avoid it.. It's a very simple game when comparing to other, more complicated ones, but the story is quite capturing. I did get stuck quite a few times, but if you keep trying, you'll get there.. Since the only review so far seems to be from an anime hating curator, lets try to write a review from someone, who likes anime. Though i might not be the best reviewer, since I normally dont make them, i read them. xD

My progress at the point of the review is, i have beaten the main game and are trying to find the hidden secrets, still left within the tower.

So, the gameplay itself if quite interesting, if one takes into account, this is an RPG Maker VX Ace game. Its a dungeon crawling type game, where one could skip enemies, if one has learned their moving patterns. You can expect to grind a bit though.

The fighting itself is really nice, though it does have some flaws. There are some enemies and mini bosses, who cant do anything, after they have less than 0.5 AP, making the fight impossible to lose.
This luckily doesnt happen to the main and secret bosses, since they can replenish their AP, even if their AP-regeneration has been debuffed.

The story itself is quite good, though, since i played other games by Neok, i know, he could have done better. Its just about, you and your teammates Karin, Mishika and Aeri, trying to find the secrets of the towers, wont spoil much more about this, since it does have some nice plots.

The music is nice, though some tracks can get a bit repetitive after a while.

And the art style, is well drawn, though here is the point, its somewhat anime oriented and might not suit everyone.

 Last Words

Well, I do recommend that game to others, though it has it flaws and might not suit everyone with its gameplay and art style. For me personally, I think the 8,49\u20ac have been well spend. Its main game is long enough, to not get to repetitive, while actually staying fun.

For those, who are still unsure about this game, maybe check the playtrough of Hadriex, it might help to decided, if it worth it for you, or wait for a discount.

. A great boardgame...made better by not having to deal with the mind boggling number of pieces and line of sight rules. Sucks♥♥♥♥♥♥. It was fun to check this out
Whoever likes to read, this is very relaxing
